ANNOUNCEMENT

2017

SCIENTIFIC ENRICHMENT & OPPORTUNITY PROGRAM

The Scientific Enrichment and Opportunity Program at Case Western Reserve University School of Medicine is designed to provide high school students from the Cleveland Metropolitan School District with a unique opportunity to engage in medical research projects. At University School this program is open to sophomore Anderson Scholars in Science and any rising 10th, 11th or 12th grade member of the Pembroke Society.

Students will be selected for participation in this exciting program based on their interest in science, their scholastic achievement and letters of recommendation submitted by their high school science teachers and sponsors. To be eligible for this program, applicants must have a minimum GPA of 3.0. Students must be at least 14 years old by June 1, 2017.

This research experience is intended to enhance the student’s interest and knowledge in the biomedical sciences, provide them with an unparalleled professional experience in the sciences and bring them in contact with the School of Medicine faculty and students for both academic and career mentoring.

Through this program, the students will receive reinforcement from a unique support network comprised of School of Medicine faculty & students to continue on through college education and subsequently in the biomedical profession.

Students will be expected to participate in research projects on a full-time basis, for an eight (8) week period, from June 5 through July 29, 2017. Each student will receive a stipend of $500.00 for the summer research project and $500.00 for travel & meal expenses.
