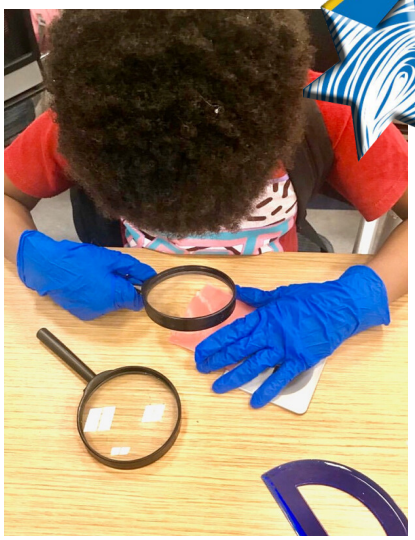
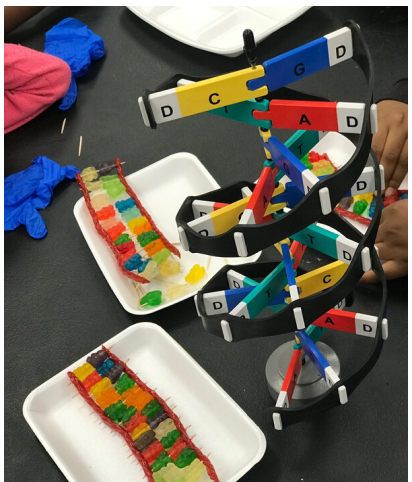
CSI: FORENSIC SCIENCE CAMP

CSI: Forensic Science Camp is a hands on, interactive forensic science based camp that offers real life experiences of crime scene investigators. Our curriculum will include microscopic examination of physical evidence hairs/fibers, 2D/3D footwear impressions, identifying buried bones, building a DNA model, searching for physical evidence using metal detectors, collecting fingerprints from various surfaces using a ultra-violet light source and bite mark impressions. Mock crime scene investigations will include forensic photography, note taking, crime scene diagramming, forensic autopsy and much more. Campers will use real investigative techniques used by professionals in the field to solve crimes.





Blueprint Camp

Ages 8-15
June 1-5, 2020
8:45 - 3:10 pm
