COVID-19 IMPACT PLANNING

The safety and health of our students, faculty, staff, and families will lead how and where we learn and operate. Our belief in our mission and our years of experience and expertise will ensure the quality and high standards of our instruction.

We are working tirelessly to ensure that throughout this crisis we will continue to deliver on our educational mission.

**HEALTH & SAFETY**

Under the guidance of medical experts and public health officials, the MCDS COVID 19 Task Force is currently working on health and safety procedures and protocols for the reopening of our campus when it is prudent to do so.

**SUMMER 2020**

**Summer Camps:** Virtual programs begin June 1st. On-campus programs will begin as soon as we can return to campus.

**Academic Courses:** Credit and non-credit courses begin June 15 for grades 6-12. Courses are free to MCDS students.

**GATEway Experience:** A virtual travel experience to Argentina and Latin America that begins June 15.

**FALL 2020**

Across all divisions, we are expanding our flexible and hybrid learning options. Synchronous and asynchronous instruction will continue to be key components of an MCDS education.

Should we need to close our physical campus during the fall semester we are prepared to pivot to remote learning.

Faculty leaders are developing plans to allow continued access to MCDS online courses and educational experiences to accommodate the travel and health needs of our families.

**FINANCES**

We are working on financial models should we need to transition to a period of online instruction or limit our operations and offerings due to social distancing requirements.

Tuition assistance is available to those families severely impacted by the Coronavirus.
