PHOTO UPDATES DURING YOUR STUDENT'S PROGRAM

A few times during your student's program, photos will be available from their group via the Wilderness Adventures app. Please refer to the "Photos" column above to identify the days these updates will be posted. Photos will be posted by the end of the designated day. More information regarding the WA App will be shared before the summer.

Limited cell service makes it difficult for the group to share more than a handful of photos with each update. Rest assured that all photos taken by trip leaders will be shared with families after the summer. We appreciate your patience!

POTENTIAL ITINERARY CHANGES

Any itinerary updates will be communicated with families via the Wilderness Adventures app. WA directors put significant effort into planning fun, adventurous, appropriately challenging and eye-opening experiences for our students. We will do everything within reason to not stray from the itinerary as planned. However, itineraries can change depending on a variety of unpredictable factors.

Alterations are sometimes necessary and unavoidable for the health, safety, well-being, and enjoyment of the students. If an activity or area is altered for any reason (absent a force majeure), it will be replaced with a comparable activity or area, conditions permitting. Normal terms and conditions apply to trips with itinerary changes.
